After that, extract the content from the setup and run the Crack File. It's ready. Enjoy. [sociallocker id="13584"]Q: How can I capture the value of the current row on an asp:checkbox in the RowDataBound event How can I capture the value of the current row on an asp:checkbox in the RowDataBound event. I'd like to compare it to a value from the database and set the value of the checkbox to true or false. I am relatively new to coding and I'm having a bit of a difficult time finding something that may help me with what I want to do. Thanks in advance! My current code is: protected void Button1\_Click(object sender, EventArgs e) { string sqlConnection = @"Data Source=.\SQLEXPRESS; AttachDbFilename=C:\Users\joe\Desktop\test.mdf; Integrated Security=True; User Instance= 82157476af
