English

Real time Chroma key

The image displays a real-time chroma key interface. On the left, a 'Camera' settings panel includes 'Requested settings' with fields for Width (800), Height (600), and FPS (90), and checkboxes for 'Flip Horizontal' and 'Flip Vertical'. Below this is a 'Distortion' section with a checked 'Apply correction' and sliders for K1 and K2. The 'VR Overlay' section has checked options for 'Track with HMD' and 'High quality overlay', along with X, Y, and Z coordinate fields. The central area shows a 3D model of a racing seat on a green background. On the right, the 'ChromaKey' panel features a 'Backdrop' button, a 'Mode' dropdown set to '3 Colour', and a color selection tool with 'Brightness' and 'Saturation' sliders. It also shows RGB values (R: 215, G: 1, B: 248) and a 'Color Hex' field with the value #D701F8. At the bottom of this panel are checkboxes for 'Range', 'HueRange', and 'Edge Sharp'.
